THE WEEK WITH THE FARM BOARD.

A radio talk by Edgar Markham, assistant to the chairman of the Federal Farm Board, delivered through WRC and 38 other radio stations associated with the National Broadcasting Company, September 26, 1930.

After a conference with the Federal Farm Board, Mr. E. F. Creekmore, President and General Manager of The Cotton Stabilization Corporation, has just announced that the 1929 stabilization cotton will not be sold while farmers are marketing this year's crop. In a formal statement, Mr. Creekmore said:

"The present holdings of The Cotton Stabilization Corporation amounting to 1,300,000 bales will be maintained throughout the present cotton season ending July 31, 1931, unless the price in the meantime advances to or above the purchase price. If any part of these holdings is sold in order to meet special requirements of mills or for other sufficient reasons, the quantity thus sold will be replaced immediately by the purchase of an equal number of bales so that the total holdings will remain unchanged."

Among the delegations in conference this week with the Farm Board was one from Texas that is working out a drought relief plan for some twenty counties in the western part of that State. It was headed by Mr. Amon G. Carter, Fort Worth newspaper publisher, and was accompanied by Senators Sheppard and Connally and Representatives Garner and Jones. Assurance was given that the Farm Board would lend every possible assistance to cooperatives in Texas to help meet the situation.

Reports coming to the Farm Board indicate that farmers throughout the Grain Belt are feeding wheat. Some who have fed wheat to hogs report they are getting as much as \$1.50 a bushel for it in the form of pork. A leading farmer of Washington County, Kansas, has written that he and many of his neighbors are feeding wheat with a view to boosting the price of wheat. "I think, after all," he says, "this wheat must be consumed and a fictitious price cannot be established, so if we can have the help of the hogs, cows and chickens to consume this wheat we have made a step in the right direction."

Numerous requests are being made for a bulletin just issued by the Department of Agriculture which tells how to feed wheat. Any farmer wishing a copy of the bulletin, which is Miscellaneous Publication No. 96-MP, may obtain it by writing either to the Department or to the Farm Board.

Nearly all of the State agricultural colleges have issued pamphlets on feeding wheat to livestock. The latest of these to come to the attention of the Farm Board is Circular No. 44-C, prepared by President Shepherd and professor Christensen, of the North Dakota Agricultural College.

The Farm Board, this week, was given first-hand information on the operation of the new California grape industry program by Mr. Frederick J. Koster, of San Francisco, Chairman of the Grape Control Board.
